amitay.site@gmail.com

Profile

DevOps specialist with expertise in managing complex IT infrastructures including Linux and Windows Server environments, virtualization, network administration, and information security. Demonstrated capability in self-directed learning and delivering high-quality service under pressure, seeking to contribute technical excellence in a challenging technological environment.

Professional Experience

Systems Engineer
Syveres

2021 - Present

Managed and maintained Linux and Windows Server systems while implementing virtualization solutions including VMware, Hyper-V, and NetApp storage.
Implemented automation with PowerShell and Chef for server and configuration management, alongside Docker containers for application deployment.
Customized Grafana and Prometheus dashboards for system performance monitoring while supporting cloud services including Office 365 and Azure AD.

System Engineer
Ness Technologies

2019 - 2021
Site: Elbit Ramat Hasharon

Maintained security level 3 clearance while managing information security systems including Forcepoint DLP and OPSWAT solutions.
Administered Windows server infrastructure including Exchange, Active Directory, DNS, and DHCP for mission-critical environments.
Implemented and managed VMware-based virtualization environment while securing network infrastructure using Forescout NAC technology.

Technical Support
Ness Technologies

2017 - 2019
Site: Kaplan Hospital

Managed user administration and permissions in Active Directory, GPO and Exchange environments.
Resolved issues in complex IT systems, including Cisco-based telephony infrastructure.
Supported specialized enterprise systems including Fax2Mail and Enterprise Vault applications.

Education

Server 2016
John Bryce

2018

• Managed enterprise infrastructure components including Active Directory, Group Policy, and PowerShell scripting
• Specialized in cloud and virtualization technologies focusing on Azure AD and Hyper-V implementation

### Tech-Pro
Bynet SAMECH

2016 - 2017
Israel

• Specialized in computer hardware, Windows Server, DNS, and Exchange server technologies
• Gained comprehensive knowledge in networking and information security fundamentals

Full Torah Studies

1999 - 2014
